- i Accurately cost Bills of Materials on demand.
- i Costing updated whenever Products are received.
- i Print BOM Costing for Full Cost Breakdown.
- i Full installation, configuration and support provided by Sage Experts Red Business Systems.
- i [View](#) Full Range of Sage Manufacturing applications

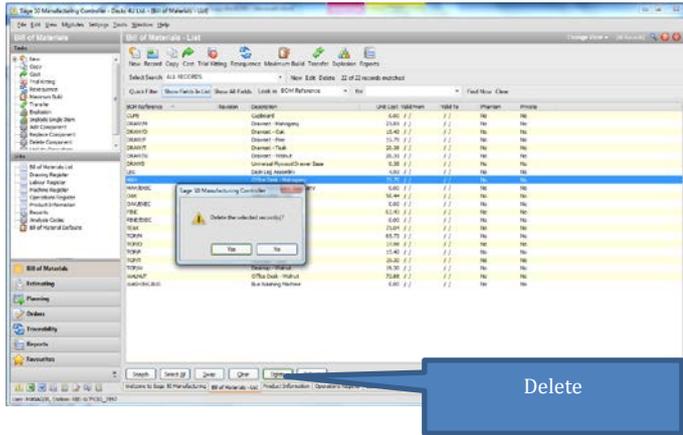

# How to Amend a Bill of Material Using Sage Manufacturing.

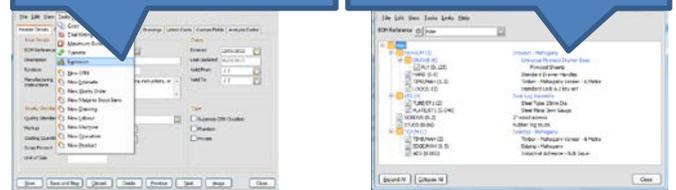

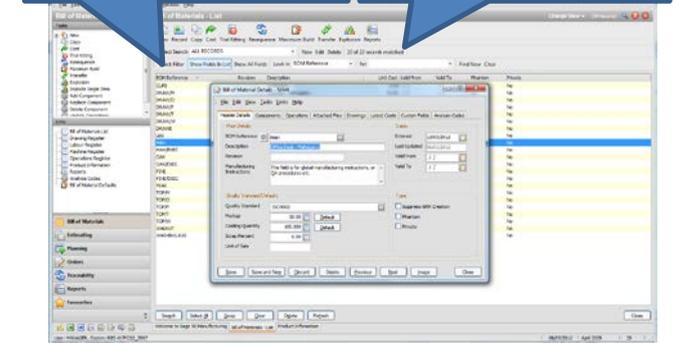

Use the Bill of Materials menu tabs to navigate the information held.

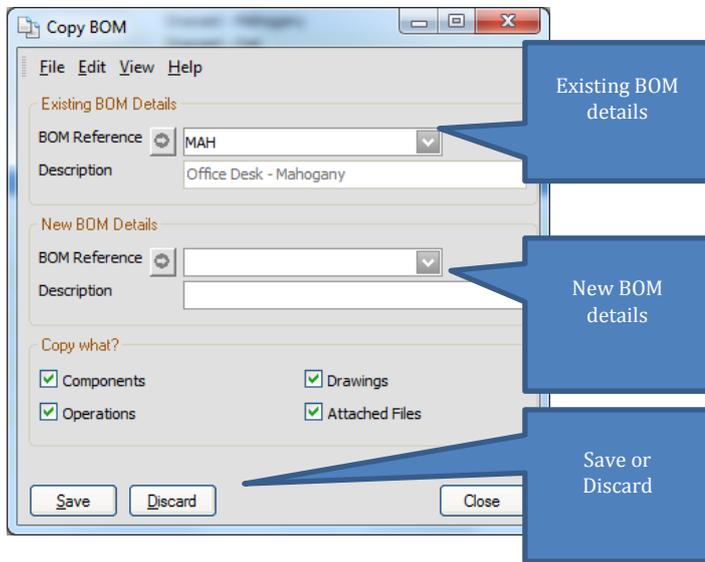

To Delete an item select it in the list and click delete when the window opens.

Open the Bill of Materials and select the record to be amended.

## Copying a Bill of Materials

## Copying a Bill of Materials

The copy option allows you to quickly create a B.O.M., similar to one which already exists. Before copying the BOM, make sure that you create the new 'BOM Reference' as a product in Accounts.

In the Bill of Materials tab select the BOM you want to copy and then click 'Copy' in the menu tabs.

The new BOM now appears in the Bill of Materials window and you can make amendments as you require.

Copying detail from existing BOM listings will speed up new entries where common settings are used.
