Sage 50 Manufacturing

MRP Stock Projection Information Screen

What does the Stock Information Screen Display?

This utility allows you to look at a list of predicted stock for all or a specific range of products in each time period. You can see stock predictions for:

- Products below minimum level
- Those with negative stock,
- Those above maximum level.

How do I access the MRP Stock Projection Utility?

Open: Modules > Planning > Material Requirements Planning (MRP) > Stock Projection

MRP Recommendations Stock Projection- Item Details

To access the "Item Details" select "Item Details" from the drop down menu,

The Stock Projection Item Details menu will then appear

e

The Display Tags/Exceptions window appears.

•

- The Tags page displays all of the links between sub-jobs, to fulfil a final sales order
 - For example, the tag displayed on the previous page shows to fulfil "S/O 21 for Business Exhibitions":
 - \circ ~ The MRP has found that 50 Mahogany Office desks need to be made
 - To do this, "P/O 1013 was made for 50 studs"
 - $\circ~$ A sub-W/O is also required to make "100 Mahogany Draws" in order to fulfil the order
 - For this sub-W/O to be carried out the MRP has outlined that various other components need to be ordered.
- On the next tab are the exceptions
 - This is where anything that is already available for the purchase order is displayed
 - This may because it has already been made, is already in stock, or is already on order.
